# Intel® Smart Edge

DEVELOPERS

BUILDERS

ENTERPRISES

Intel® Smart Edge is Edge-Native software that accelerates development and deployment of highly optimized, secure and scalable distributed computing platforms and solutions to unleash services at the Edge

# Accelerating Time to Market for Edge Builders with Smart Edge Experience Kits

Pre-Validated

Pre-Integrated

Location / Use Case Optimized

Reference Blueprints composed of a set of Building Blocks Carefully Selected, Optimized on IA and Integrated with Modern Tools to host a specific set of Edge Services

## Private Wireless

## SASE (Secure Access Service Edge)

## Developer

### Economics

Pre-validated kits and specific K8s clusters ensure a working, verified blueprint, speeding deployment and revenue realization.

### Ease of Use

Developer-friendly formats with Ansible scripts, helm charts, and setup playbooks, delivering **ease of use** and adoption.

### Experience

Vertical reference implementations pull together the experience kit and commercial applications from a rapidly growing ecosystem of ISVs already validated on the Smart Edge portfolio.

# Unleashing Developer Innovation on Smart Edge

## Creating an Innovation-Friendly Environment for Edge Developers

Experience Smart Edge capabilities with the

### Developer Experience Kit

- Edge Video Analytics Microservices (EVAM) with OpenVINO part of DEK for [video analytics](#) applications
- Edge Insights for Industrial (EII) offered as part of DEK allows for seamless data ingestion, analytics and insights for [Industrial 4.0 use cases](#)
- Arctic Sound-M (Intel GPU) enabled on DEK enables [media processing](#) and [AI inference acceleration](#)
- Support for RAN Intelligent Controller (RIC) for Network AI apps

Test and Prototype with Use Case specific
